6 Tree Sculpture Walking Tour

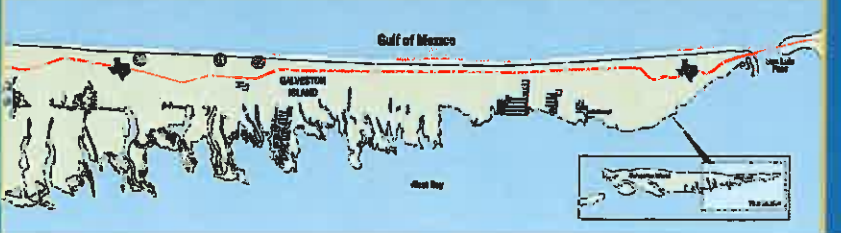

➔ Pick up map at the Visitor Information Center

SEAWEED

Each year there's a potential for seaweed to wash up along Galveston's beaches during spring and early summer months. The name seaweed incorrectly implies that this "weed" has little value. In fact it is a thriving ecosystem and once arriving onshore, the "weed" becomes a vehicle for preventing coastal erosion and is an invaluable food source for many coastal birds.

Please be tolerant of seaweed. It is an integral part of the Gulf of Mexico ecosystem.

Proposed Pedestrian Wayfinding Kiosk Locations 4.4.12
