SHRIMP INVESTIGATION

Quarterly Report

From: October 1, 1951

To: December 31, 1951

Biologist: E. D. McRae, Jr.

Boat: Carey

Crew: Saturnino Garcia
David Mejardo

INTRODUCTION

The annual report for the fiscal year September 1, 1950 - August 31, 1951, included the first twelve months of the shrimp investigation; this period extended from January, 1951 through December, 1951. For this reason, the annual report includes the scientific data taken during the first quarter of the current fiscal year (October-December, 1951). However, the information pertaining to certain other phases and activities during this quarter was not included. It appears below.

GALVESTON BAY SURVEY PROJECT

An investigation of certain areas in Galveston Bay was undertaken during the latter half of this quarter. Work was begun on November 26, 1951 and terminated on December 15, 1951. The base of operations, during this survey, was the town of Seabrook, Texas. A written report covering the findings of this project was submitted upon completion of the investigation.

UTILIZATION OF TIME

The number of hours of work accredited (below) to the crew is a report of the time spent on the boat "Carey". No attempt is made to show the amount or extent of the

crew members participation in other activities at the
laboratory,

Month	Lab.	Biologist Field	Total	Crew
October	122-1/2	222-1/4	344-3/4	307
November	38-1/4	355	393-1/4	419-1/4
December	101-3/4	307	408-3/4	274-3/4
Total	262-1/2	884-1/4	1146-3/4	1001
